

Park & Springs Academies Sheffield

Project:
Park & Springs
Academies

Location:
Sheffield

M&E Contractor:
Derry Building
Services

Completion:
December 2007

The two new Park and Springs Academies, specialising in Business and Performing Arts respectively, provide students with a truly 21st Century learning environment, and also share their facilities with the local community.

TREND automatic controls are used throughout the buildings, not just within Plant Rooms, but at individual classroom level. Controlling the ventilation to each individual room and providing occupants with local adjustment maximises comfort throughout the year, whilst occupancy sensors ensure energy efficient operation.
